Impact evaluation is an opportunity: PROGRESA

- influence imitators
- defend from political change
- modify during scale-up
- more (sustainable) funding
- contribute to public knowledge
Benefits of rigor likely to exceed costs when...

1. cost relatively low
2. policy decision not needed instantly
3. consequences of wrong policy particularly bad
4. impossible to treat everyone
5. strong interests necessitate an objective criterion of “success”
6. evaluated setting is similar to scaled-up intervention
